# ALGORITHMIC FOUNDATIONS OF ROBOTICS X

Springer Feb 2013, 2013. Buch. Book Condition: Neu. 235x155x40 mm. Neuware - Algorithms are a fundamental component of robotic systems. Robot algorithms process inputs from sensors that provide noisy and partial data, build geometric and physical models of the world, plan high-and low-level actions at different time horizons, and execute these actions on actuators with limited precision. The design and analysis of robot algorithms raise a unique combination of questions from many elds, including control theory, computational geometry and topology,...
