NYU Press. Paperback. Book Condition: New. Paperback. 240 pages. Dimensions: 8.9in. x 5.9in. x 0.8in. An intriguing and impressive account of corporate social responsibility and neoliberalism writ large on the ground, in action, in chemical plant communities in Louisiana. Ottinger effectively illustrates how, in complex, culturally saturated ways, corporate commitment to responsible care has created critical challenges for environmental activism and justice. Kim Fortun, Rensselaer Polytechnic Institute Residents of a small Louisiana town were sure that the oil refinery next door was making them sick. As part of a campaign demanding relocation away from the refinery, they collected scientific data to prove it. Their campaign ended with a settlement agreement that addressed many of their grievances but not concerns about their health. Yet, instead of continuing to collect data, residents began to let refinery scientists' assertions that their operations did not harm them stand without challenge. What makes a community move so suddenly from actively challenging to apparently accepting experts' authority? *Refining Expertise* argues that the answer rests in the way that refinery scientists and engineers defined themselves as experts. Rather than claiming to be infallible, they began to portray themselves as responsible. This work drives home the need for both activists and politically engaged scholars to reconfigure their own activities in response, in order to advance community health and robust scientific knowledge about it. Gwen Ottinger is Assistant Professor in Interdisciplinary Arts and Sciences at the University of Washington-Bothell, where she teaches in the Science, Technology, and Society and Environmental Studies majors. She is co-editor of *Technoscience and Environmental Justice: Expert Cultures in a Grassroots Movement*. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
