

Bulletin of the Geographic Society of Chicago Volume 5 (Paperback)

By Geographic Society of Chicago

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1913 edition. Excerpt: .less than that in the beechmaple and from 1.8 to 2.6 times as great as in the lowest stratum of marsh. c) Verticat differences in evaporating power and other conditions.-The evaporating power of the air is usually greater at the higher levels of a habitat. TABLE XXXVI Evaporation From Porous Cup Evaporimeters In Different Strata Of A Summer Dry Marsh, Cambridgeshire, England, During Three Periods Between July 9 And September 8, 1907 (Yapp, 129, p. 299) Table XXXVI shows marked differences in the rate of evaporation and considerable differences in temperature at the different levels, both due largely to vegetation. Differences in light are also to be expected. Sherff (136, p. 420) has found conditions similar to the above by a two months study of evaporation on Skokie Marsh near Chicago. The evaporation there was three times as great at a height of 1.95...
