 Summary: Short-term trading refers to the practice of buying and selling financial instruments within the same trading week or, at most, a few weeks. Short-term traders buy and sell stocks over a few days or weeks in the hope that their stocks will continue climbing in value for the time they own them, making for quick and, often, huge profits. Some of the more commonly traded financial instruments are stocks, stock options, currencies, and futures contracts such as equity index futures, interest rate futures, and commodity futures. Short-term trading was once the preserve of banks, financial firms, and professional investors. Many traders are bank or investment firms employees working in equity investment and fund management. As with many other business segments, the Internet, technology, and legislative changes have opened up this attractive marketplace to a new breed of individual investors and speculators working part-time. You and I can now stand on an even playing field with the largest banks, wealthiest individuals, and trading institutions from the comfort of home. Short-term trading can provide you with very high and secure rate of return...
