The mole was surgically removed and after a short recovery period it was all but forgotten. Yearly skin and lymph node checks kept his concerns about melanoma at bay until an unusual, relentless pain in the back of his head led to an MRI that unveiled the horrible truth; Jerry had stage IV metastasized malignant melanoma. His cancer had spread, undetected, all throughout his body over the course of that 13 years. Jerry s illness taught his friends and family the meaning of unconditional love. This is the story of the love, support, courage and devotion of a family and community to Jerry Galusha during the 4 months of the remainder of his life; a life that was cut short from malignant melanoma.
